

allo release 14.04.23 (allo 2.1.1)

Last updated by | Irone Egbejule | 17 Apr 2023 at 08:53 BST

1. Introduction 🙌

The *allo* team have been busy working on some bugs that have been affecting the functionality of *allo* for our users. Help and support on how to use *allo* features is available on our website <https://heyallo.co/how-to-guide/> 📄

2. Overview 💬

We have undergone some bug fixes & made some tweaks to *allo* to optimise your experience. Just some of these changes include a fix of issues concerning roles & permissions, tweaks to the reports page and improving the importing & exporting template experience.

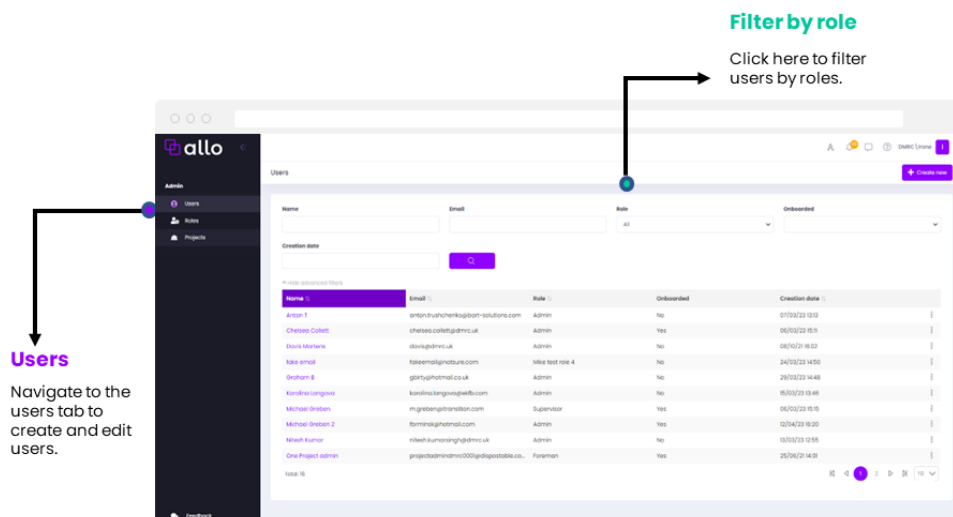

3. Impacted users 👤

- Admin
- Supervisor
- Foreman

4. Bug fixes 🥰

Admin

- Users are now able to filter by **role** on the users page

- Can now successfully **create a new role** and assign it to any user.
 - Users can only perform functions that correspond to **permissions** assigned to the new role e.g. "View only"
- Users can now **export people, plant, material and plant** data files from *allo* to their local device
 - The **exported file** will mirror the file exported from *allo*.

- The **exported file** can be imported back into *allo*.

Supervisor

- Can now successfully complete allocation activities on all EKFB issued **mobile devices**.

Foreman

- Delegate issue resolved

All users

- Users can now search by **filters** on any of the widgets in the reports page.
- Users can now **search by element** in the *control accounts* project data page.
