

# allo release 29.03.23

Last updated by | Thomas Belton | 5 Apr 2023 at 15:47 BST

---

## 1. Introduction 🙌

The allo team have been busy working on some bugs that have been affecting the functionality of allo for our users. Help and support on how to use allo features is available on our website

<https://heyallo.co/how-to-guide/> 📄

## 2. Overview 💬

We have fixed an issue in our system that occurred as the clocks went forward an hour at 1:00 am on British standard time (BST) on 26/03/23. When users selected a date for an activity, they would find the activity appeared in the wrong section. The activity would appear under the heading for the day before the selected date. So, if a user selected an activity to be completed today, the activity would appear under the "Yesterday" heading on the "Complete forms" page.

## 3. Impacted users 👤

- Admin
- Foreman
- Supervisor

## 4. Bug fixes 😊

Admin, Foreman & Supervisor:

- The issue concerning incorrect date selection because of Daylight savings has been resolved. Users can now select a date for an allocation activity and the activity will appear in the correct section, not the day before on the complete forms page.
